However, on 5/19/23 at approximately 6:30 PM a female RA (Resident Assistant) requested 2 male RAs to assist her with the provision of evening care and toileting for Resident #1. Shortly after approaching Resident #1 to assist with the transfer from his/her wheelchair to the toilet, the resident became combative, kicking and hitting. Instead of removing the resident from the bathroom; allowing him/her to calm down and be reapproached by staff at a later time, the RAs continued to remove the resident from the wheelchair while s/he continued to struggle defensively against the staff. Utilizing 2 male RAs was contraindicated especially when Resident #1 was experiencing increased anxiety and defensive behaviors. As a result, staff reportedly demonstrated increased force during the transfer from Resident #1's wheelchair to toilet while attempting to avoid Resident #1's repeated hitting and kicking. The transfer and increased agitation experienced by Resident #1 was avoidable if staff followed the service plan to include re-approaching the resident after a period of time, utilizing different staff and avoiding confrontation when Resident #1's behavior's became combative and difficult to manage safely. The staff failed to maintain a safe/secure and calm environment for Resident #1. On the afternoon of 6/6/23, the Director of Health Care Services acknowledged staff failed to follow the service plan developed to manage Resident # 1's behaviors.	R145
