Underhill, VT 05489-9341

Dear Ms. Slingerland:

Enclosed is a copy of your acceptable plans of correction for the survey conducted on March 23, 2016. Please post this document in a prominent place in your facility.

We may follow-up to verify that substantial compliance has been achieved and maintained. If we find that your facility has failed to achieve or maintain substantial compliance, remedies may be imposed.

Sincerely,

Pamela M. Cota, RN
Licensing Chief

R100	Initial Comments: An unannounced onsite re-licensing survey plus investigation of one entity reported incident and one complaint were conducted by the Division of Licensing and Protection from 3/22-23/16. There were no regulatory violations identified related to the entity report or the complaint. The following regulatory deficiencies were identified during the re-licensing survey.	R100		
R259 SS=D	VII. NUTRITION AND FOOD SERVICES 7.3 Food Storage and Equipment 7.3.i Poisonous compounds (such as cleaning products and insecticides) shall be labeled for easy identification and shall not be stored in the food storage area unless they are stored in a separate, locked compartment within the food storage area. This REQUIREMENT is not met as evidenced by: Based on observation and staff interview, the facility failed to assure that all potentially poisonous compounds such as cleaning products were stored in a separate, locked compartment in the main kitchen. Findings include: 1. During the initial tour of the home's main kitchen on 3/22/16, the surveyor identified an open shelf which contained cleaning products. On 3/23/16 at 10:00 AM, two kitchen staff confirmed that the cleaning products are currently stored on the open shelf in the main kitchen.	R259	7.3 A secure cabinet has been purchased and will be installed in the kitchen when it arrives.	4/29/16

Subject: Second Spring North water test result

Hello Tom,

ECS has completed water quality sampling in March 2016 at Second Spring North. The sample location, date, analyses and results are noted on the attached laboratory report. The sample was collected and transported in accordance with standard procedures.

No coliform bacteria were detected in the water sample. Based on these results, this water sample passes the criteria for potable water as presented in the Vermont Water Supply Rule. No nitrite was detected in the water sample. Nitrate was detected at 0.039 mg/L and the Vermont Primary Groundwater Quality Standard is 10 mg/L.

In order to obtain a representative sample, the tap water was allowed to run for approximately ten minutes with the aerator removed from the disinfected faucet before collecting the sample. The sample was delivered under chain of custody in an ice filled cooler to Endyne, Inc. in Williston, Vermont for laboratory analysis.

Let me know if you have any questions.

Thank you,

Katrina

Laboratory Report

Enclosed please find the results of the analyses performed for the samples referenced on the attached chain of custody. All required method quality control elements including instrument calibration were performed in accordance with method requirements and determined to be acceptable unless otherwise noted.

The column labeled Lab/Tech in the accompanying report denotes the laboratory facility where the testing was performed and the technician who conducted the assay. A "W" designates the Williston, VT lab under NELAC certification ELAP 11263; "R" designates the Lebanon, NH facility under certification NH 2037 and "N" the Plattsburgh, NY lab under certification ELAP 11892. "Sub" indicates the testing was performed by a subcontracted laboratory. The accreditation status of the subcontracted lab is referenced in the corresponding NELAC and Qual fields.

The NELAC column also denotes the accreditation status of each laboratory for each reported parameter. "A" indicates the referenced laboratory is NELAC accredited for the parameter reported. "N" indicates the laboratory is not accredited. "U" indicates that NELAC does not offer accreditation for that parameter in that specific matrix. Test results denoted with an "A" meet all National Environmental Laboratory Accreditation Program requirements except where denoted by pertinent data qualifiers. Test results are representative of the samples as they were received at the laboratory.

Endyne, Inc. warrants, to the best of its knowledge and belief, the accuracy of the analytical test results contained in this report, but makes no other warranty, expressed or implied, especially no warranties of merchantability or fitness for a particular purpose.
